Summary

Skilled system engineer with 10+ years of experience in IT, ranging from DevOps technologies to Research and Development jobs. Experience building, deploying, and managing scalable infrastructure in the cloud and in-house. Knowledge of designing Infrastructure, Networks, and Compliances for different Systems

Technical Skills

Languages and Scripts: Python, Bash.

Database: PostgreSQL, MySQL.

VCS: Git, Github, Github Enterprise, GitLab.

Infrastructure: AWS, Azure, VMware, Hyper-V.

AWS Services: AWS Organizations, IAM, VPC, EC2, S3, RDS, CloudWatch, Amplify, Route53, Billing, Amazon Connect, AWS Lex, Cost Explorer.

Networking: Cisco Switches/Firewall, Pfsense, OpenSense, Sophos, Ntopng, Cyberoam, Meraki, Unifi, Cambium, Mikrotik.

Server Technologies: Windows AD, Windows Server 2016/2019, Windows NPS, IIS, Scripting, Nginx, Apache, HAproxy, LetsEncrypt (Certbot), Redhat IPA, FreeIPA, Ansible, Terraform, Docker, Snort IPS/IDS, Suricata, Ubuntu Pro, FreeRadius, Sonarqube, Jit, OpenVAS.

Monitoring/Logging Tools: Zabbix, Opensearch, Grafana, Nagios, Observium, DataDog, Site24x7, Graylog, ELK Cloud, Wazuh

Compliance Tools: Vanta, Drata, Gapps, ZeusCloud, ScoutSuite, Prowler

Collaboration: JIRA, Slack.

Methodology: Scrum, Kanban.

Compliance: HIPAA, SOC2.

SaaS Services: Office 365, Google Workspace, JumpCloud, NinjaOne, Jamf, Apple Business, Bitdefender GravityZone, Cloudflare, Vercel, OnSip, Twilio, Godaddy, Atlasian.

Certification: Microsoft Certified Professional 2016

Professional Experience

Leapfrog Technology Inc.

(Jan 2017- Sep 2024)

Principal Engineer, SysOps

- Ensure adherence to Leapfrog's compliance standards.
- Lead, manage, and foster growth within IT, SysOps, and SecOps teams.
- Develop AWS-based and in-house infrastructure solutions while optimizing costs for the projects.

- Design and implement systems tailored to organizational needs.
- Oversee IT infrastructure and asset management, reporting directly to the CTO.

Lead Engineer, IT

- Ensure compliance with organizational standards.
- Conduct training for IT support, SysOps, and SecOps teams.
- Manage AWS, Azure, and Google Workspace infrastructures.
- Optimize in-house infrastructure solutions and manage associated costs.
- Implement systems as per organizational requirements.
- Oversee IT infrastructure and asset management, reporting directly to the CTO.

Senior Engineer, IT

- Manage wired and wireless systems, including networking devices and firewalls.
- Oversee in-house server operations, covering Linux, Windows servers, firewalls, VPN technologies, hypervisors, and backup systems.
- Provide AWS and Azure support to the organization.

Team Quest

(April 2016 - Dec 2016)

IT Officer

- Manage wired and wireless systems, including networking devices and firewalls.
- Oversee in-house server operations, covering Linux, Windows servers, firewalls, VPN technologies, hypervisors, and backup systems.
- Maintain CMS application and provide operational support.

National Law College

(Nov 2014 - April 2016)

IT Officer

- Manage wired systems, including networking devices, CCTV and firewalls.
- Oversee in-house server operations, covering Linux, firewalls, VPN technologies, hypervisors, and backup systems.
- Maintain CMS application and provide operational support.

Education

Purbanchal University

Bachelor in Information Technology (2008-2013)

Microsoft Learning Center
